Got an email from microsoft, wanting to help "certify" minecraft for win 8. I told them to stop trying to ruin the pc as an open platform.

@notch I didn't know you had a problem with closed platforms. Why don't you go ahead and pull your game from iOS & Xbox 360. #Hypocrites

**Markus Persson** @notch · 28 de set de 2012

@fahdriyami There's a difference, you know. Microsoft owns the XBOX, Apple owns the iOS. The charm of the PC is that nobody owns it.

@notch @fahdriyami But Microsoft owns Windows, If they want to certify apps on their operating systems it's their choice, PC's remain open.

**Markus Persson** @notch · 28 de set de 2012

@LeStuartWallace @fahdriyami Microsoft is free to do whatever they want with their OS. I won't support all of what they do, however.
